

*This bit set is included with a bundled offer along with the video class **Fundamentals of Cabinet Making**. It will be shipped to you when you purchase this special bundle.*

3-PIECE SELF-CENTERING HINGE BIT SET

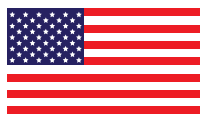

Simplify the task of pre-drilling holes for hinges or other screw-mounted hardware by ensuring that the hole is accurately centered every time.

With these bits in your shop, you'll perfectly align your screw holes with the holes in your hinges, drawer slides or other similar hardware. And the design of the bits lets you quickly and easily change from one bit to the next.

This Set includes 5/64", 7/64", and 9/64" spring-loaded self-centering bits for #2 - #4, #6, and #8 - #10 screws. These bits feature extremely precise machined components including a retractable hardened bushing for center drilling directly in the hardware you choose.

- 5/64", 7/64", and 9/64" quick-change hinge bits
- Drills accurate holes for hinges, handles, drawer slides, and more
- Standard hex shank fits all power bit and quick change chucks
- Spring-loaded
- Self-centering
